

I'm just learning about Low Power FM, and the proposal to expand this service.

I'm concerned that this might effect a station that I listen to on an FM translator.

K-LOVE, heard in Portales on 90.7, is a huge asset to our community. Small towns like ours across the United States are served by this excellent Christian music station, and I urge you to take steps to keep LPFM stations from taking priority over current FM translator services.

Thanks for reading my comments,  
Sandra Fields
